If you stop to figure out where the true economy in paint buying comes, you'll soon see that the best paint is cheapest.

Two-thirds the cost of painting is the labor. It costs just as much to put on poor paint as it does good paint—more in fact because the poor paint doesn't work so easily. But the poor paint won't last as long; it makes you repent sooner.

Even the apparent saving in cost per gallon is eaten up by the fact that it takes more gallons of the low priced paint.

The true economy is good prepared paint.
